COMPANY OVERVIEW

1. COMPANY OVERVIEW
2. COMPANY HISTORY
3. STRENGTHS

Samyang Fine Chemical Co., Ltd has been exponentially established its foundation from 1999 through extensive and diverse experience.

Company Overview

Founded in 1999, Samyang Fine Chemical Co., Ltd. has contributed to the South Korea chemical industry through solidified cooperation and strong bonds with domestic customers. Alongside diverse business partners, we have supplied not only competitive raw materials, but also new and eco-friendly resources throughout the domestic market. This is achieved through research and development aimed at maximizing customer value creation. Leveraging our extensive experience, Samyang Fine Chemical Co., Ltd. offers technical support and services tailored to meet customer demands. Our company constantly endeavors to enhance customer competitiveness and adapt to the dynamic market's changing demands.

ESG

1. SUSTAINABLE MANAGEMENT
2. COMPLIANCE MANAGEMENT SYSTEM

Samyang Fine Chemical Co., Ltd is committed to environmental responsibility and strives for sustainable management and compliance with regulations.

Sustainable Management

Importance of K-REACH Registration

What is the K-REACH?

K-REACH (The Act on the Registration and Evaluation of Chemicals Substances) is a regulation that was officially implemented on January 1, 2015. It mandates that new chemical substances with an annual production volume of 0.1 tons or more, and existing chemical substances with an annual production volume of 1 ton or more, must be registered before they can be distributed in South Korea. The regulation also introduced a pre-registration system similar to the EU-REACH, requiring all existing substances produced at 1 ton or more per year to be pre-registered by the first half of 2019. After pre-registration, there is a grace period during which substances must be fully registered by the designated deadlines based on their tonnage in order to be legally distributed in the South Korean market.

Samyang Fine Chemical Registered Products

Category	Item
1000MT†	TiO ₂ (Titanium dioxide)
100MT†	Hexamine, D.B.E(60%)(Pentanedioic acid dimethyl ester), PENTA(Pentaerythritol), DI-PENTA85%(85%)(Dipentaerythritol), REDH130/481/red718/brown4686 (Diiron trioxide), IRON OXIDE BLACK(4401)(Triiron tetraoxide), P-BLUE(Copper, phthalocyanine), DIBA(Hexanedioic acid bis(2-methylpropyl) ester; Diisobutyl adipate), and 33 others
10MT†	2EHA(2-Ethylhexyl acrylate), OF1300(Siloxanes and silicones, di-Me, 3-hydroxypropyl group-terminated), DMTDA(2(or 4)-Methyl-4,6(or 2,6)-bis(methylthio)-1,3-benzenediamine), D.B.E(20%)(Butanedioic acid dimethyl ester), PMA(Propylene glycol methyl ether acetate), RED 49.1(C.I. pigment red 049:1), CROMELASTIC AC9/CROMELASTIC 0249PRG/(Dipropylene glycol dimethyl ether), and 77 others
1MT†	12HSA(12-Hydroxy octadecanoic acid; 12-Hydroxystearic acid), COPS1 1%[(2-Propenyloxy)methyl]oxirane), RED 81(C.I. pigment red 081), VIOLET27-6228(C.I. pigment violet 027), RED169(C.I. pigment red 169), TALLICIN 4600(2,4-PENTANEDIONE), VIOLET3(C.I. pigment violet 003), VIOLET1(C.I. pigment violet 001), orange34(C.I. pigment orange 034), and 40 others

Why is it important?

Purpose of K-REACH

The K-REACH law aims **to protect public health and the environment** by regulating the registration of chemical substances, the assessment and evaluation of the hazards and risks associated with chemicals and products containing hazardous chemicals, and the designation of hazardous substances. It also requires the collection and utilization of information on chemicals. K-REACH was introduced in response to major chemical safety incidents, such as the toxic hydrofluoric acid leak in Gumi and the humidifier disinfectant disaster, **to prevent harm** by proactively managing chemicals.

By registering **over 150 items under K-REACH** and submitting the necessary registration data, we have established a solid foundation for providing our partners with consistent and reliable supply.

Compliance Management System

Operation of 7 Large Warehouses

We operate seven spacious warehouses located throughout the Seoul metropolitan area and southern regions, enabling quick dispatch and fast, active responses. Our warehouses are pre-registered for handling toxic and hazardous materials, which allows us to manage a wide range of products. This is one of the unique strengths of Samyang Fine Chemical Co., Ltd.

Hazardous Substance Control

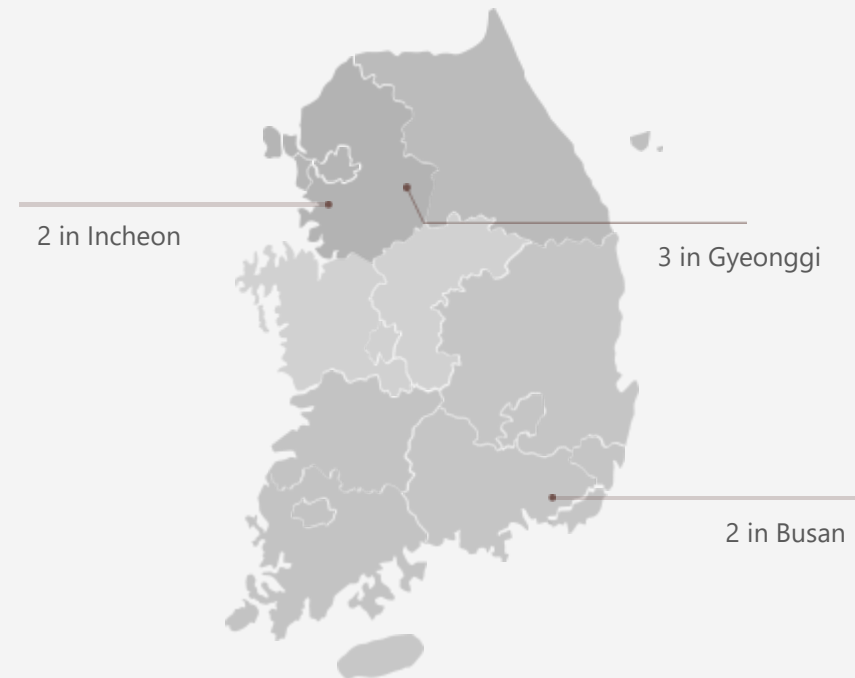

Through close collaboration with warehouses capable of storing and managing hazardous and toxic materials, we are able to provide a wide range of products with "Just In Time Delivery."

- Direct shipping available from Busan
- Fast and efficient OFFERS
- Dedicated personnel always on standby
- Active and responsive handling of all shipping inquiries

*** On Demand Delivery**
